

The power of connected minds

Research Scientist Global Metabolism (m/f)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

As a reliable partner of the rural economy, Crop Protection offers innovative, sustainable solutions for plant protection and health. With the agricultural center in Limburgerhof, close to the BASF Group headquarters in Ludwigshafen, you can expect an attractive place for both work and play in the Rhine-Neckar region.

What you can expect

Within our unit Consumer Safety Metabolism, you will lead a laboratory team and provide your employees with guidance in career and skill development.

- o You will develop, implement and communicate regulatory science strategies and defend them to internal and external stakeholders.
- o You will plan and conduct all agreed studies to investigate the metabolism in plants and animals.
- o You will also be responsible for other regulatory activities (e.g. dossiers, risk assessments) according to compliance, safety and financial requirements.
- o You will be responsible for the coordination and implementation of global, national and regional technical and scientific projects as well as the strategic and efficient use of external suppliers.
- o Beyond that, you will develop and implement new ideas and proactively transfer knowledge as well as expertise within and outside the organization.

What we expect

- o You have successfully completed your studies in natural sciences (Master/Diploma/Ph.D.), engineering, pharmacy or veterinary medicine.
- o Due to your previous work experience, you can provide substantial expertise in the field of natural product chemistry and have good knowledge in metabolism as well as in chemical purification.
- o Furthermore, you are familiar with the application of analytical techniques.
- o Besides your profound experience in project management, you are able to present results and communicate effectively.
