

If you are looking for healthy job prospects, then this is the company for you. We have operated a successful and expanding pharmaceutical company for over 40 years, specialising in the research, development and marketing of treatments and diagnostics in the areas of oncology, urology and autoimmune diseases. Over 1,000 motivated employees in Germany and abroad contribute to our growth by sharing their ideas.

For our Pharmacology and Toxicology department, we are looking for you as a

Senior Preclinical Project Manager (m/f) Department: Pharmacology and Toxicology

Your Tasks:

- Active contribution in planning, coordination and control of the conduct, analysis and reporting of contracted non-clinical in vitro and in vivo studies
- Evaluation of scientific publications and other pharmacological/toxicological reports as well as preparation of preclinical parts of due diligence reports
- Preparation of relevant preclinical documents in the context of generic, bibliographic or full dossier submissions for approval for marketing authorization as well as in the course of preclinical and clinical development of investigational new drugs
- Demonstrated experience from previous work in pharmaceutical industry; communication with health authorities; understanding of regulatory submission components (including IB, IMPD, DSUR, PSUR, SA, PIP, CTA, MA)
- Fluent English (oral and written)
- Detailed knowledge of MS Word, Excel, PowerPoint, MS-Project
- Team spirit, dedication and sense of responsibility as well as an independent and reliable way of working

What to expect:

- A positive corporate culture with an open and partnership-based approach
- Self-responsible work
- Extensive, attractive social benefits
- Various opportunities for further training

Your Background:

- University degree (PhD, MD, PharmD or DVM) in biology, chemistry, medicine, pharmacy or veterinary medicine
- Appropriate training and experience in the field of pharmacology/pharmacokinetics/toxicology
- Knowledge regarding international guidelines for preclinical drug development and non-clinical dossier structure (CTD) for pharmaceuticals

Your Application:

If you are interested in a career change, we would be pleased to receive your application documents at bewerbung@medac.de.
